TECHNOLOGY,  
SUSTAINED WITH  
TRUST, THIS IS  
CORNERSTONE

## YOUR CORNERSTONE

With Cornerstone, you gain a needed partner with expertise in an ever changing field. We can be a complement to your existing IT staff or be your dedicated provider. A strong and trusting relationship is always beneficial in business. It is our goal to establish and keep that relationship. Cornerstone was built with such a vision in mind and will continue to present that vision to our clients years into the future. Contact us to find out what we can do for you.

## MANAGED SERVICES

Your network's integrity is at the foundation of your company's daily functionality. Providing solutions for businesses both large and small, Cornerstone works with you to tailor a managed services package that fits your needs and your budget, all while ensuring that you are taking a proactive approach to protecting your network and data.

### What We Do:

- Manage and monitor desktops, servers and network appliances
- Implement virus, spam and spyware/malware software
- Install and manage software updates and patches
- Provide both local and offsite data backup for your servers and workstations
- Manage firewalls, switches and other network devices
- Recommend and administer an effective email solution
- Work with you to develop a technology road map for your business

## IT AS A SERVICE (ITaaS)

Cornerstone has fast become an industry leader in providing businesses with solutions that create efficiency and security. Our goal has always been to cultivate a relationship with our clients that is built on trust, so that we are able to help them develop and implement the plan to take their technology needs to the next level.

Part of that relationship includes providing your business with the specific tools needed to carry out your day to day operations. Our IT as a Service platform takes the concept of managed services to the next level, by providing your business or organization not only with the technical support to ensure it runs smoothly, but also the actual hardware, licensing, and configuration of those items.

- One fixed monthly cost
- All hardware included
- All software included
- All labor included
- Antivirus included
- Network documentation
- License management
